

MOHAWK

TIRE SERVICE RECORD

Please ensure that your tire service information is recorded below at the recommended service interval.

NOTE: In the event of a warranty claim, this page must be attached to the MOHAWK Tires Limited Warranty Claim Form.

Date of Rotation	Odometer	Dealer Name	Dealer Address	Front Air Pressure	Rear Air Pressure

For maximum tire life, it is important to follow the recommended 5,000 mile intervals or less for light truck tires.

After each rotation, set the tire air pressure as recommended on the vehicle's Tire Information Placard or by your tire professional if the original size has been changed to an optional size.
